[linkedin.com/in/saqibddb](https://www.linkedin.com/in/saqibddb)

A Front-end Web Developer, experienced with JavaScript (AngularJS, jQuery, AJAX), HTML5, CSS3 (Sass, Bootstrap, Foundation), Git etc. Passionate about the Front-end, beautiful design and fluid user experiences.

## Education

### Media Information and Technology

Western University 2007 – 2011  
Courses included: HTML, CSS, JavaScript, SQL, Adobe Dreamweaver, Adobe Photoshop, UI/Web Design, UX Research, Wordpress Development

## Skills

### HTML5

### CSS3

### JavaScript

## Experience

### Freelance Front-end Developer MAKE Marketing Consultants

Nov 2017 – Present Toronto, Canada Area

Began accepting freelance proposals from numerous connections, including a previous company I was employed at, Healthy Planet. Eventually teamed up with Make Consultants to help source more freelance opportunities and projects.

### Senior Front End Developer Tangerine

Nov 2016 – Present

Initially hired as Marketing's dedicated Front-end Developer for their website redevelopment project, I was soon promoted to Senior Front-end Developer where my focus shifted to corporate projects and team leadership. During my time at Tangerine I set up departmental processes (including development, design and QA), leading the company's first SEO initiative, working closely with the Data Analytics team to refine the data tracking process, implementing Accessibility standards in order to be WCAG 2.0 AA compliant, and setting up A/B tests through Google Optimize.

### Front End Developer Sym-Tech Dealer Services

Jan 2016 – Nov 2016

Brought on to provide Sym-tech with an overall web UI identity, that was to be used in all projects moving forward. Worked with a team of backend developers in launching a web app (Sym-Tech Portal, used by 400+ dealerships) - built on MeteorJS, I was responsible for wireframing/mock-up the UI and then programming the responsive front end in AngularJS, Angular Material and Sass/CSS.

### Front End Developer Gryphtech

May 2015 – Dec 2015 Toronto, Canada Area

development departments. Day-to-day responsibilities/work process: meeting with product managers to determine client requirements, rounds of wireframe iterations, user interface designing and finally development of responsive front-ends. Prominent projects: RE/MAX and Keller Williams Redesign/Development.

### Interim CTO | Media & Marketing Manager Healthy Planet Canada

Sep 2011 – Jan 2015 Toronto, Canada Area

Among the numerous marketing-related duties (branding, media relations, sales etc), I worked as an interim CTO during the redevelopment of the e-commerce webstore developed using Magento. Tasks included acting as a liaison between the development team that I lead and the stakeholders, front-end development of the site and some UI/UX design.
