[linkedin.com/in/saqibddb](https://linkedin.com/in/saqibddb)  
[saqibddb.github.io](https://saqibddb.github.io)

A Front-end Web Developer and UI Designer, experienced with JavaScript (AngularJS, jQuery, AJAX), HTML5, CSS3 (Sass, Bootstrap, Foundation), Git, Sketch, Adobe Creative Suite etc. Passionate about the Front-end, beautiful design and fluid user experiences.

## Education

### Media Information and Technology

Western University 2007 – 2011  
Courses included: HTML, CSS, JavaScript, PHP, SQL, Adobe Creative Suite, UI/Web Design, UX Research, Wordpress Development

## Skills

### HTML5

### CSS3/Sass

### JavaScript/jQuery

### Web Design(Sketch, Adobe CS)

## Experience

### Senior Front End Developer Tangerine

Nov 2016 – Present

Initially hired as Marketing's dedicated Front-end Developer for their website redevelopment project, I was soon promoted to Senior Front-end Developer where my focus shifted to corporate projects and team leadership. During my time at Tangerine I set up departmental processes (including development, design and QA), leading the company's first SEO initiative, working closely with the Data Analytics team to refine the data tracking process, implementing Accessibility standards in order to be WCAG 2.0 AA compliant, and setting up A/B tests through Google Optimize.

### Freelance Front-end Developer | Web Designer MAKE Marketing Consultants

Nov 2017 – Present Toronto, Canada Area

Began accepting freelance proposals from numerous connections, including a previous company I was employed at, Healthy Planet. Eventually teamed up with Make Consultants to help source more freelance opportunities and projects.

### Front End Developer | UI/UX/Web Designer Sym-Tech Dealer Services

Jan 2016 – Nov 2016

Brought on by Sym-tech to help build a new web app (Sym-tech Claims Portal) that was to be sold to Auto insurance companies as white-labelled software. I worked on a stack that consisted of AngularJS on the front and MeteorJS on the back. My responsibilities included wireframing, creating high-fidelity mockups using Sketch, collaborating with server-side developers to validate user inputs and developing interactive Angular modules that functioned as designed. Some new frameworks used were Angular Material and Sass.

### Front End Developer | Web Designer Gryptech

May 2015 – Dec 2015 Toronto, Canada Area

Hired to act as the bridge between the design and development departments. Day-to-day responsibilities/work process: meeting with product managers to determine client requirements, rounds of wireframe iterations, user interface designing and finally development of responsive front-ends. Prominent projects: RE/MAX and Keller Williams Redesign/Development.

### Interim CTO | Media & Marketing Manager Healthy Planet Canada

Sep 2011 – Jan 2015 Toronto, Canada Area

Among the numerous marketing-related duties (branding, media relations, sales etc), I worked as an interim CTO during the redevelopment of the e-commerce website developed using Magento. Tasks included acting as a liaison between the development team that I lead and the stakeholders, front-end development of the site and UI/UX design.
